LAN School Remote Power On/Off Instructions (Room 827)

I. Power on Student Computers

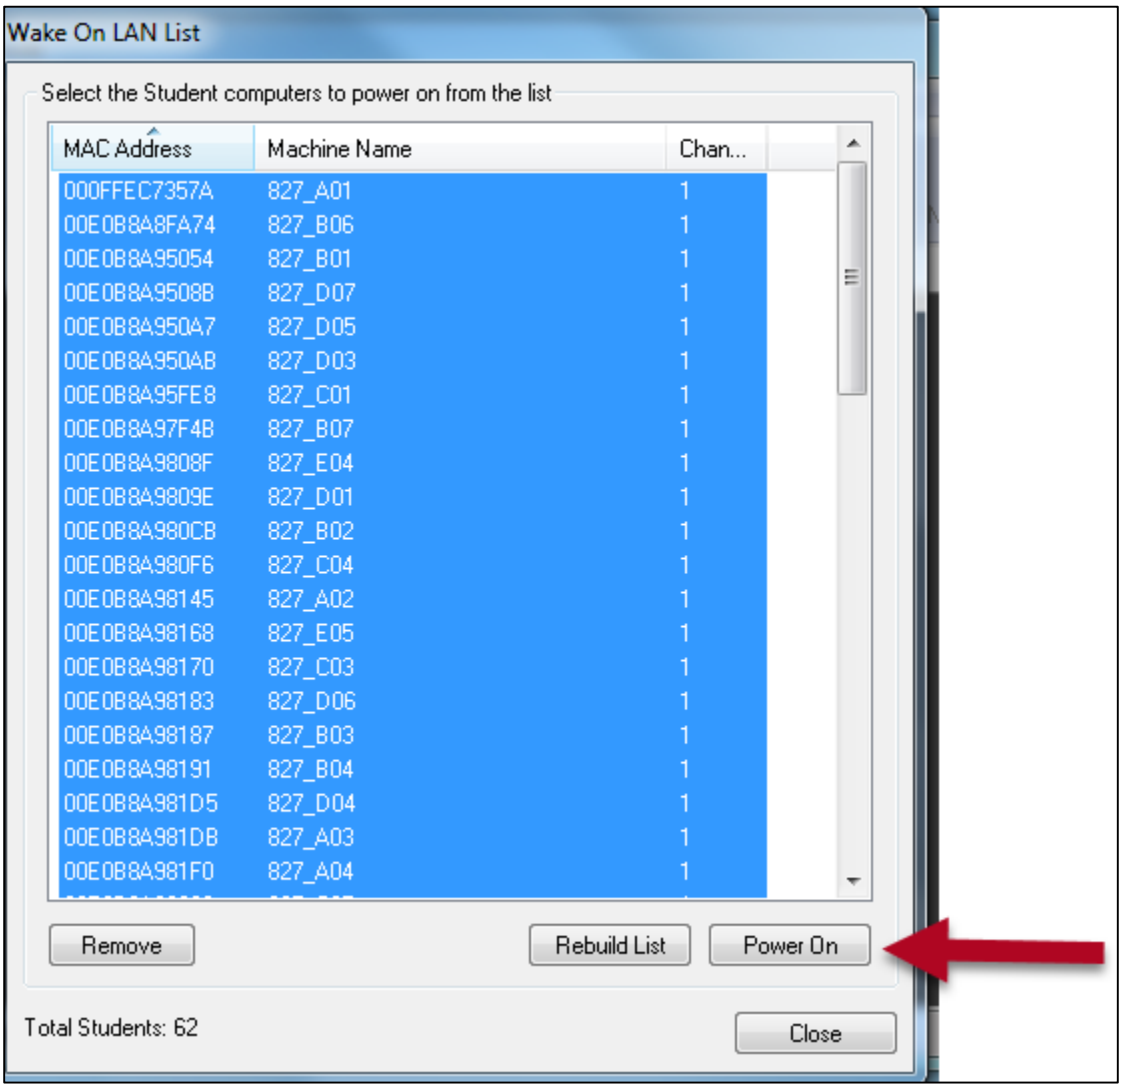

1) Start the instructor's computer at the front of the 827 classroom. Open Up **LAN School Teacher Console** (in bottom right corner of screen in system tray)

2) Select the **Admininster** menu item from the top of the Teacher Console. Choose **Power On Student.**

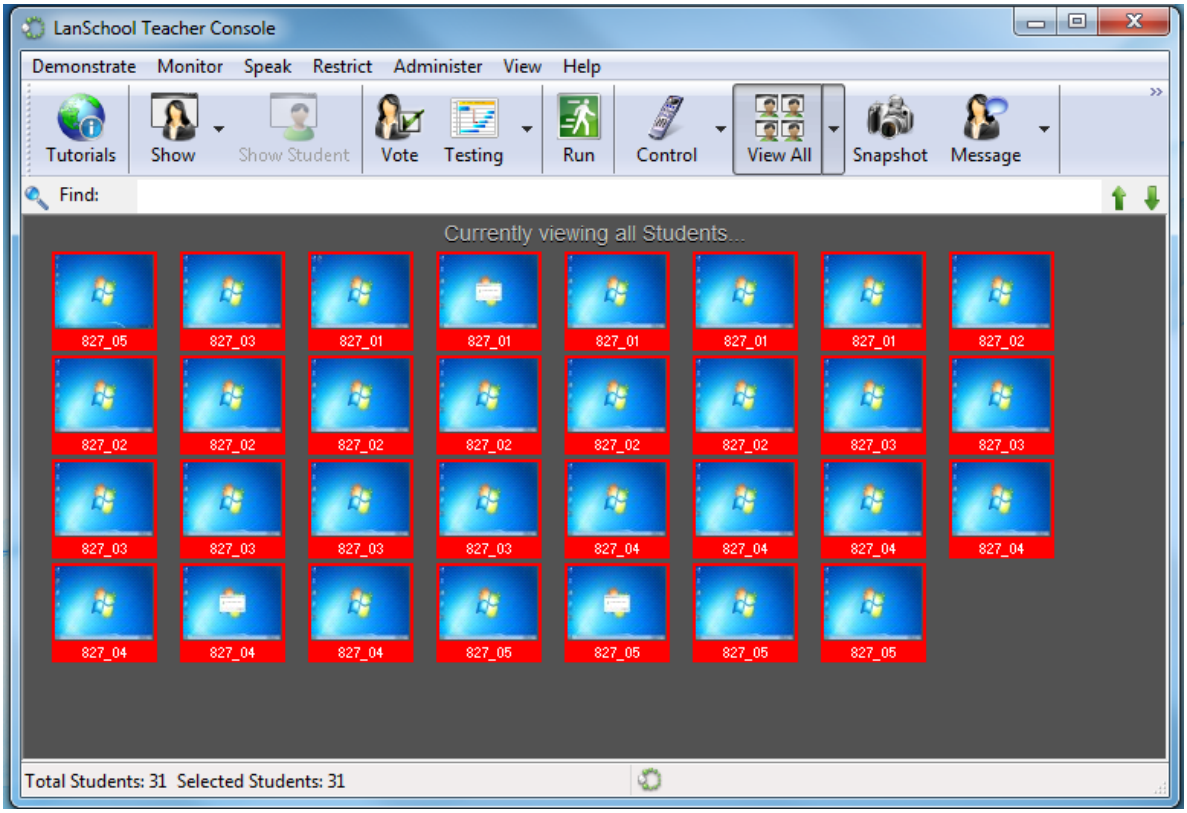

3) You will now see all of the different student computers listed by Machine Name and MAC Address. They should all be selected and highlighted in blue. Click on **Power on Student** to start all student computers.

II. Power Off Student Computers

1) From the **LAN School Teacher Console**, select all student computers by pressing **CTRL + A** on your keyboard. A bright red boarder will appear around the thumbnail image of each computer selected.

2) Select the **Admininster** menu item from the top of the Teacher Console. Choose **Shutdown Student. This will shutdown all student computers in Room 827.**
